

Expansion Board

1. Overview

CA001 is a fire alarm output and the expansion of joint board, it is one of the access controller add-on modules, with the software settings, mainly used to provide fire and alarm signal output of the joint. The module has a practical, simple interface, the design performance characteristics of stability. With its power and relay instructions, may direct communication failures, is a good cost performance of the joint extension.

2. Characteristics

- 1) Four-alarm output, free to the host controller to the definition of a door and the door to a number of features.
- 2) Can connect the output signal fire, the Fire received the signal controller automatically open their doors to all and have a fire alarm records available for consultation.
- 3) Support for the "illegal intrusion" and "the door is not closed for a long time" and "coercion to enter," and "linkage to open the door" and "invalid card" and "fire" alarm linkage output, and so on.
- 4) Can be set for each output of the delay time 0-6000 seconds.

3. Structure
